Table of Contents

GRAPH THEORY
by
Ronald J. Gould
Emory University

Chapter 1 Graphs
1.0 Introduction 1
1.1 Fundamental Concepts and Notation 1
1.2 Elementary Properties and Operations 8
1.3 Alternate Representations for Graphs 14
1.4 Algorithms 16
1.5 Degree Sequences 19
1.6 Fundamental Counting 25

Chapter 2 Paths and Searching
2.1 Distance 33
2.2 Connectivity 47
2.3 Digraph Connectivity 56
2.4 Problem Solving and Heuristics 59

Chapter 3 Trees
3.1 Fundamental Properties of Trees 69
3.2 Minimal Weight Spanning Trees 71
3.3 Counting Trees 76
3.4 Directed Trees 80
3.5 Optimal Directed Subgraphs 86
3.6 Binary Trees 90
3.7 More About Counting-Using Generating Functions 99

Chapter 4 Networks
4.1 Flows 105
4.2 The Ford and Fulkerson Approach 107
4.3 The Dinic Algorithm and Layered Networks 114
4.4 Layered Networks and Potential 118
4.5 Variations on Networks 119
4.6 Connectivity and Networks 124

Chapter 5 Cycles and Circuits
5.1 Eulerian Graphs 133
5.2 Adjacency Conditions for Hamiltonian Graphs 139
5.3 Related Hamiltonian-like Properties 148
5.4 Forbidden Subgraphs 151
5.5 Other Types of Hamiltonian Results 155
5.6 The Traveling Salesman Problem 157
5.7 Short Cycles and Girth 159
5.8 Disjoint Cycles 162

Chapter 6 Planarity
6.1 Euler's Formula 173
6.2 Characterizations of Planar Graphs 176
6.3 A Planarity Algorithm 186
6.4 The Hopcroft-Tarjan Planarity Algorithm 190
6.5 Hamiltonian Planar Graphs 198

Chapter 7 Matchings and r-Factors
7.0 Intorduction 203
7.1 Matchings and Bipartite Graphs 203
7.2 Matching Algorithms and Marriage 209
7.3 Factoring 221
7.4 Degrees and 2-Factors 227

Chapter 8 Independence
8.1 Vertex Independence and Coverings 235
8.2 Vertex Colorings 237
8.3 Approximate Coloring Algorithms 242
8.4 Edge Colorings 248
8.5 The Four Color Theorem 252
8.6 Chromatic Polynomials 254
8.7 Perfect Graphs 256

Chapter 9 Special Topics and Applications
9.1 Graphs and Ordered Sets 265
9.2 Random Graphs 270
9.3 Ramsey Theory 276
9.4 Finite State Machines 282
9.5 Scheduling 287
9.6 Tournaments 293

Chapter 10 Extremal Theory
10.0 Introduction 305
10.1 Complete Subgraphs 306
10.2 Cycles in Graphs 314
10.3 On the Structure of Extremal Graphs 319

Appendix
