## *Vector bundles on moduli space of stable curves with marked points.*

Anna Kazanova

University of Georgia

**Abstract:** Conformal block vector bundles are vector bundles on the moduli space of stable curves with marked points defined using certain Lie theoretic data. Over smooth curves, these vector bundles can be identified with generalized theta functions. In this talk we discuss extension of this identification over the stable curves. This talk is based on joint work with P. Belkale and A. Gibney.
